

WHY LANGUAGE SCIENTIFIC?

Perceptive's imaging core lab provides advanced imaging services, including CT scans and MRIs, for clinical trials worldwide. As part of its regulatory responsibilities, Perceptive must translate Radioactive Materials (RAM) licenses submitted by clinical trial sites in different countries.

These documents are highly regulated, safety-critical, and often received as non-editable, scanned PDF files in multiple languages. Perceptive required a partner capable of handling complex regulatory translations, delivering certified accuracy, and supporting tight clinical trial timelines. Language Scientific's expertise in clinical research and regulatory translations made it a natural partner for this specialized need.

The Problem

To ensure clinical trials run smoothly, Perceptive must translate RAM licenses from international sites into English. These licenses are governed by strict regulations due to the safety risks associated with radioactive materials. The challenges included:

- Translating RAM licenses from multiple languages into English
- Working with scanned, non-editable PDF documents
- Supporting ongoing translation needs across multiple sites
- Providing certified translations with 100% accuracy for acceptable regulatory review

Any delay or inaccuracy could impact regulatory approvals and disrupt clinical trial progress.

RESULTS

Certified Regulatory Translations, Operational Continuity, Trusted Support

Provided reliable turnaround times for ongoing, multi-site translation needs

Ensured regulatory compliance for safety-critical documentation

Delivered accurate, certified translations of RAM licenses

ACTIONS TAKEN

- Met aggressive timelines without delaying trial operations
- Leverage technology to process scanned PDFs
- Provided certified translations to meet compliance requirements
- Responded quickly to urgent requests to support ongoing trial operations

"Excellent service and prices. The professionalism of Language Scientific's staff always makes working together easy."

— Shalae Monae, Supply chain coordinator, Perceptive
